

Building blocks for planning language-sensitive teacher education

The project team was able to benefit from contributions by participants of the 2023 workshop, as well as a large group of language education professionals from Serbia who were recruited by our associate partners Tamara Đorđević and Milena Kostić from the Tempus Foundation. We gratefully acknowledge the contribution of the colleagues listed below, who contributed to discussions on the materials produced by the project team, tested some of these materials and gave valuable feedback for their finalization.
