

## BarCamp: AI for Language Education

**We would like to invite you to our first BarCamp on AI for Language Education.**

What is a BarCamp?

A BarCamp, also known as an unconference, is a gathering of experts and practitioners who want to share and learn in an informal, open environment. In a BarCamp, all participants actively contribute and share their experience and know-how in a short presentation or demonstration.

In our first AI-Lang BarCamp we invite language teachers, teacher educators and language students to share their experiences with AI technology.

In this first meeting we would like to discuss the following questions:

- How can AI help language teachers plan lessons and create materials? How useful, effective and creative are the activities generated by different AI tools?
- How can AI help language learners improve their writing, speaking, listening or reading skills?

Join our online event and share a very concrete experience with a specific skill, task or tool that you have tried out. Your presentation should not exceed **15 minutes** and will be followed by 10 minutes of discussion.

**The BarCamp will be held online (on Zoom) on November 5th from 5 – 7 p.m. (Central European Standard Time: GMT+1)**

If you would like to participate, please register here:
